DATA ANALYST

Results-driven Senior Data Analyst with 4+ years of experience leveraging analytics, automation, and business intelligence to optimize operations, improve workforce productivity, and support AI/ML initiatives. Proven track record of building scalable dashboards, streamlining reporting workflows, improving data quality standards, and delivering actionable insights that influence strategic business decisions. Experienced in collaborating with cross-functional teams, senior stakeholders, and global clients to solve operational challenges using data-driven solutions. Adept at transforming complex datasets into measurable business outcomes across AI operations, workforce analytics, and data quality management.

CORE COMPETENCIES

Data analytics & business intelligence • Workforce performance analytics • KPI framework development • AI operations monitoring • Machine learning data quality analysis • Data validation & transformation • Dashboard architecture & visualization • Reporting automation • Workflow optimization • Predictive & descriptive analytics • Operational performance tracking • Cross-functional collaboration • Stakeholder reporting & communication • Data governance & quality assurance • Strategic decision support • Process improvement initiatives • Insight generation & storytelling • Business performance analysis

TECHNICAL AND SOFT SKILLS

Programming Languages: Python (Pandas, Seaborn, NumPy, Matplotlib), R (Dplyr, Ggplot)
Databases: MySQL, Microsoft SQL server, NoSQL
Cloud Computing: IBM Watson Studio, Microsoft Azure
Data Visualization: Microsoft Power BI, Tableau, IBM Cognos Analytics
Tools: Google Sheets, Microsoft Excel, Jupyter Notebooks

Soft Skills: Communication, Problem solving, Attention to details, Team Player

PROFESSIONAL EXPERIENCE

HUGO TECHNOLOGIES | Lagos, NG | *Information & technology services provider* | *Over 500 Staffs* **2021 – Present**

Senior Data Analyst - AI Operations March, 2026 - Present

- I revamped workforce analytics reporting by designing automated KPI dashboards in Power BI and Google Sheets for over 5 operational teams, reducing manual reporting time by 45% and enabling leadership to make faster data-driven decisions.
- I streamlined billing and operational analysis workflows by automating recurring reporting processes using Google sheet automation tools, improving reporting accuracy by 35% while reducing turnaround time from 2 days to a few hours.
- I partnered with operations managers and client stakeholders to develop customized real-time dashboards that tracked workforce productivity, SLA adherence, and project performance, improving operational visibility and increasing client satisfaction scores by 20%.
- I conducted trend and productivity analysis across multiple AI operations projects, identifying inefficiencies that contributed to a 15% increase in team productivity and improved resource allocation.
- I standardized reporting structures and data validation procedures across projects, improving consistency in operational reporting and minimizing reporting discrepancies by 30%.

Data Analyst - AI Operations March, 2024 - March, 2026

- I created and maintained metric dashboards to track workforce trends, including detailed analysis for better decision-making. As a result of these efforts, the company has robust dashboards and reports, enabling data-driven decisions and improved efficiency.
- I automated data processes to streamline analysis and billing, aligning with client targets. This boosted timeliness and accuracy, meeting client goals more efficiently and enhancing satisfaction. Reduced errors saved time and resources, enabling focus on strategic tasks.
- I designed and developed customized data dashboards and reports to enhance communication and address client targets. Ensuring user-friendliness and accessibility, these tools improved real-time insights for managers, leading to better decision-making and proactive client management. This bolstered satisfaction and client relationships.

Data Quality Analyst June, 2023 - Present

- I developed and implemented advanced data collection techniques, such as designing data validation processes and establishing data quality standards, as well as collaborating with cross-functional teams to ensure data collection methods aligned with business goals, resulting in 30% higher quality global data, leading to more reliable insights and better decision-making.
- I implemented a robust monitoring system, collaborating with annotation teams, and conducted regular audits to reduce errors by 20%, improving model accuracy and efficiency leading to higher-quality training data and improved model performance.
- I developed automated dashboards to visualize KPI metrics in real-time, collaborated with team leads to establish clear performance benchmarks and identify areas for improvement, enabling data-driven decision-making by providing real-time insights into the ML team's productivity and agent performance, and enhanced agent efficiency through focused training and support programs, increasing production rates by 15%.

Data Annotation Specialist Nov, 2021 - May, 2023

- I supported the ML team by utilizing internal tools to precisely annotate and label data in order to improve the precision of deep learning models and achieve exceptional performance in private projects.
- I worked with colleagues and quality analysts to choose and interpret the data that is used for machine learning models.

Award: Award Of Excellence in the Machine Learning Department, Year 2022

All AND TECH LIMITED | Lagos, NG | *Privately owned Edtech & Consultation Services* | *Over 50 Staffs* **2020 – 2021**

Data Analytics Consultant

- I spearheaded training efforts, onboarding, and upskilling team members, and through collaboration and research, I developed a product strategy. Training brought uniformity and improved team performance, while the strategy enabled informed decision-making, focused innovation, and market alignment.
- I utilized Microsoft Power BI and Tableau to design interactive dashboards that translated intricate data into intuitive visual representations, created reports enriched with charts and graphs, facilitated data analysis for clients, thereby improving data-driven decision-making by providing clear, concise, and visually appealing summaries of complex information.
- I provided in-depth training sessions for clients, emphasizing the practical use of data analytics tools, thereby empowering clients with valuable skills to effectively utilize tools like Excel, Power BI, and Tableau, boosting their confidence and improving their data analysis capabilities, and also establishing our company as a trusted resource for clients seeking educational insights and data-driven improvements.

Kunbinyin Global Ventures | Lagos, NG | *Limited liability Company.* | *Over 30 Staffs* **2018 – 2019**

Administrative Officer

- I worked with the accounting department to assist with processing incoming bills, making payments, and confirming receipts worth millions of naira.
- I was given the responsibility of preparing cost reports and office budgets while working in an administrative team of more than five people.
- I served as the liaison between the administrative team and the human resource team when it came to generating an employee database and scheduling payroll.

EDUCATION & PROFESSIONAL CREDENTIALS

BSc Degree – Zoology – University of Ilorin – 2016
Applied Data Science Lab – Worldquant University – 2023

IBM Data Science Professional Certification – IBM/ Coursera 2022
IBM Data Analyst Professional Certification – IBM/Coursera 2022
Udacity/ALX Data Analysis Certification – Udacity 2022
PWC Switzerland Power BI Virtual Case Internship - 2023
